

Setophaga petechia distribution (presence- absence)

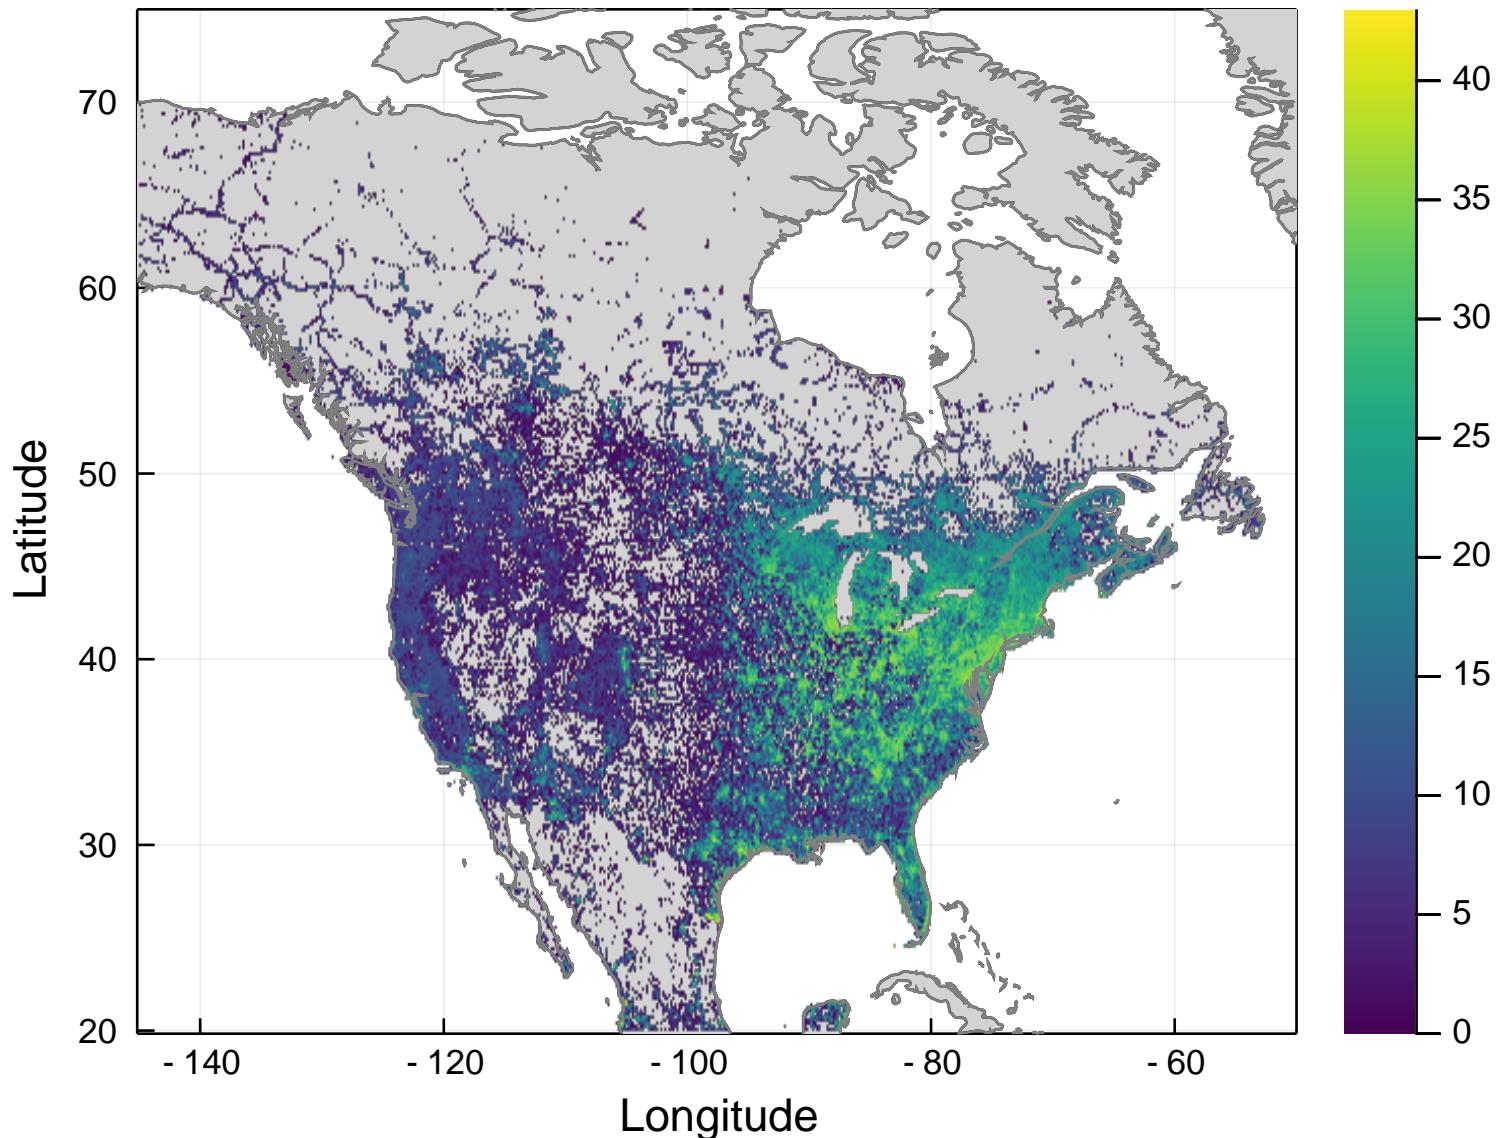

Setophaga_townsendi distribution (presence- absence)

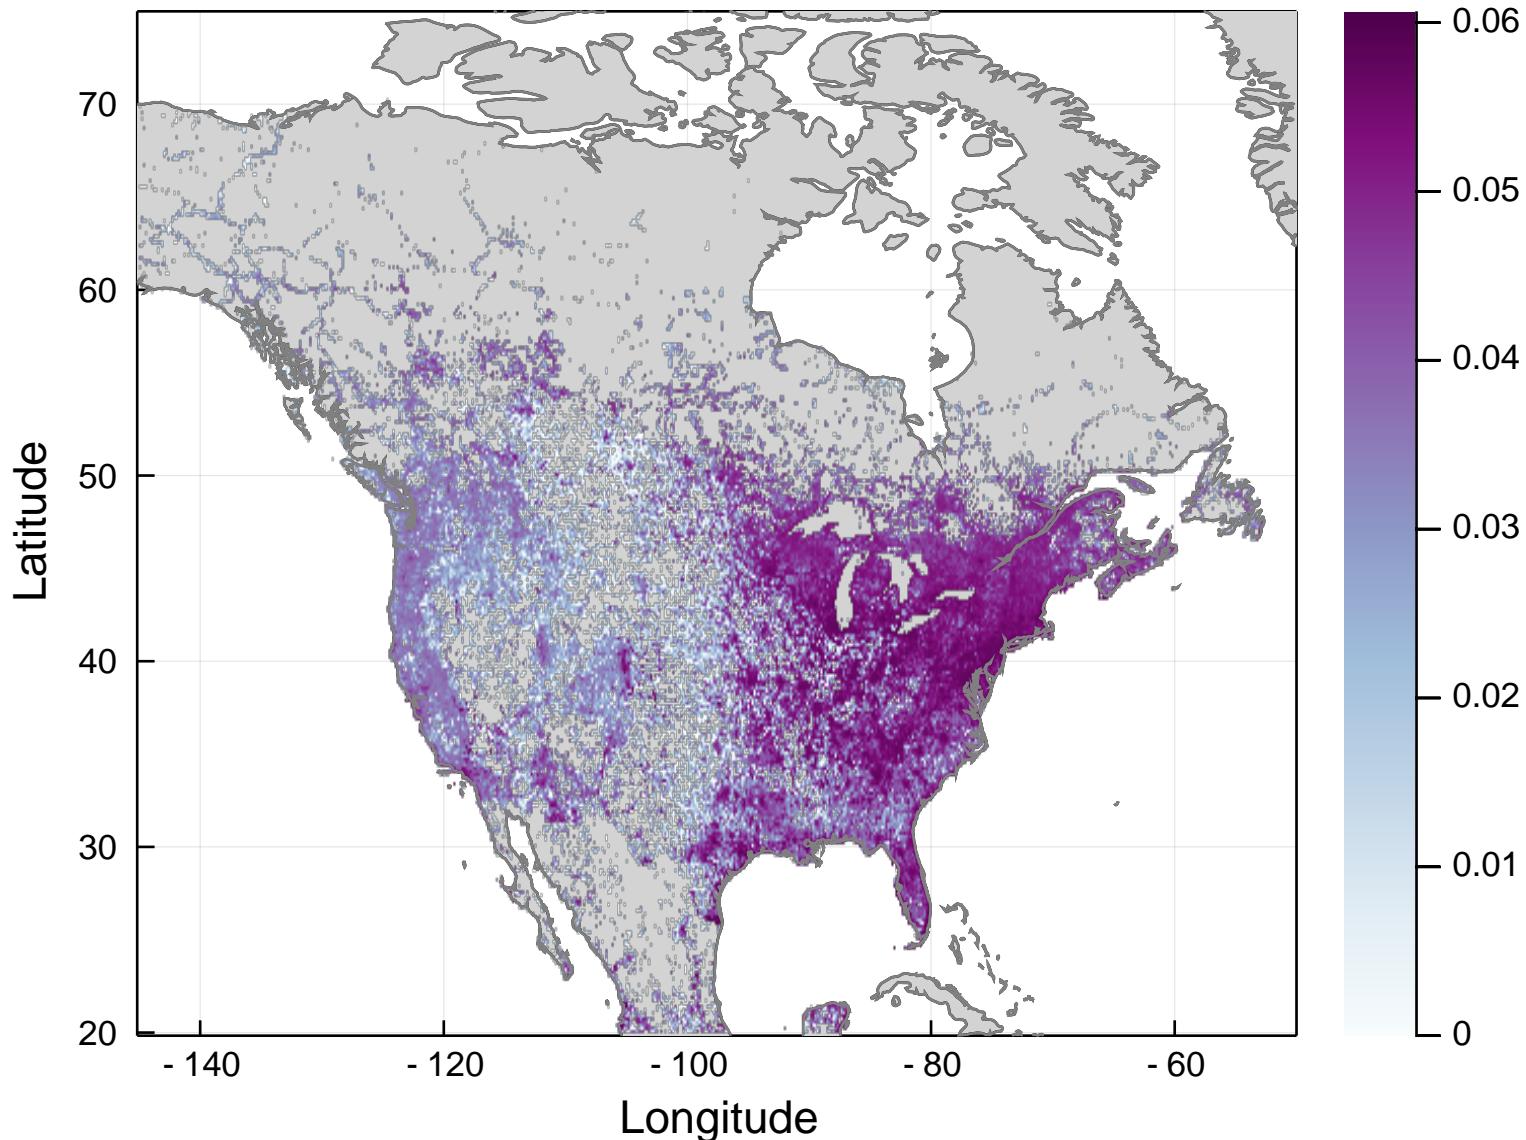

Presence-absence matrix Y (sorted by row and column sums)

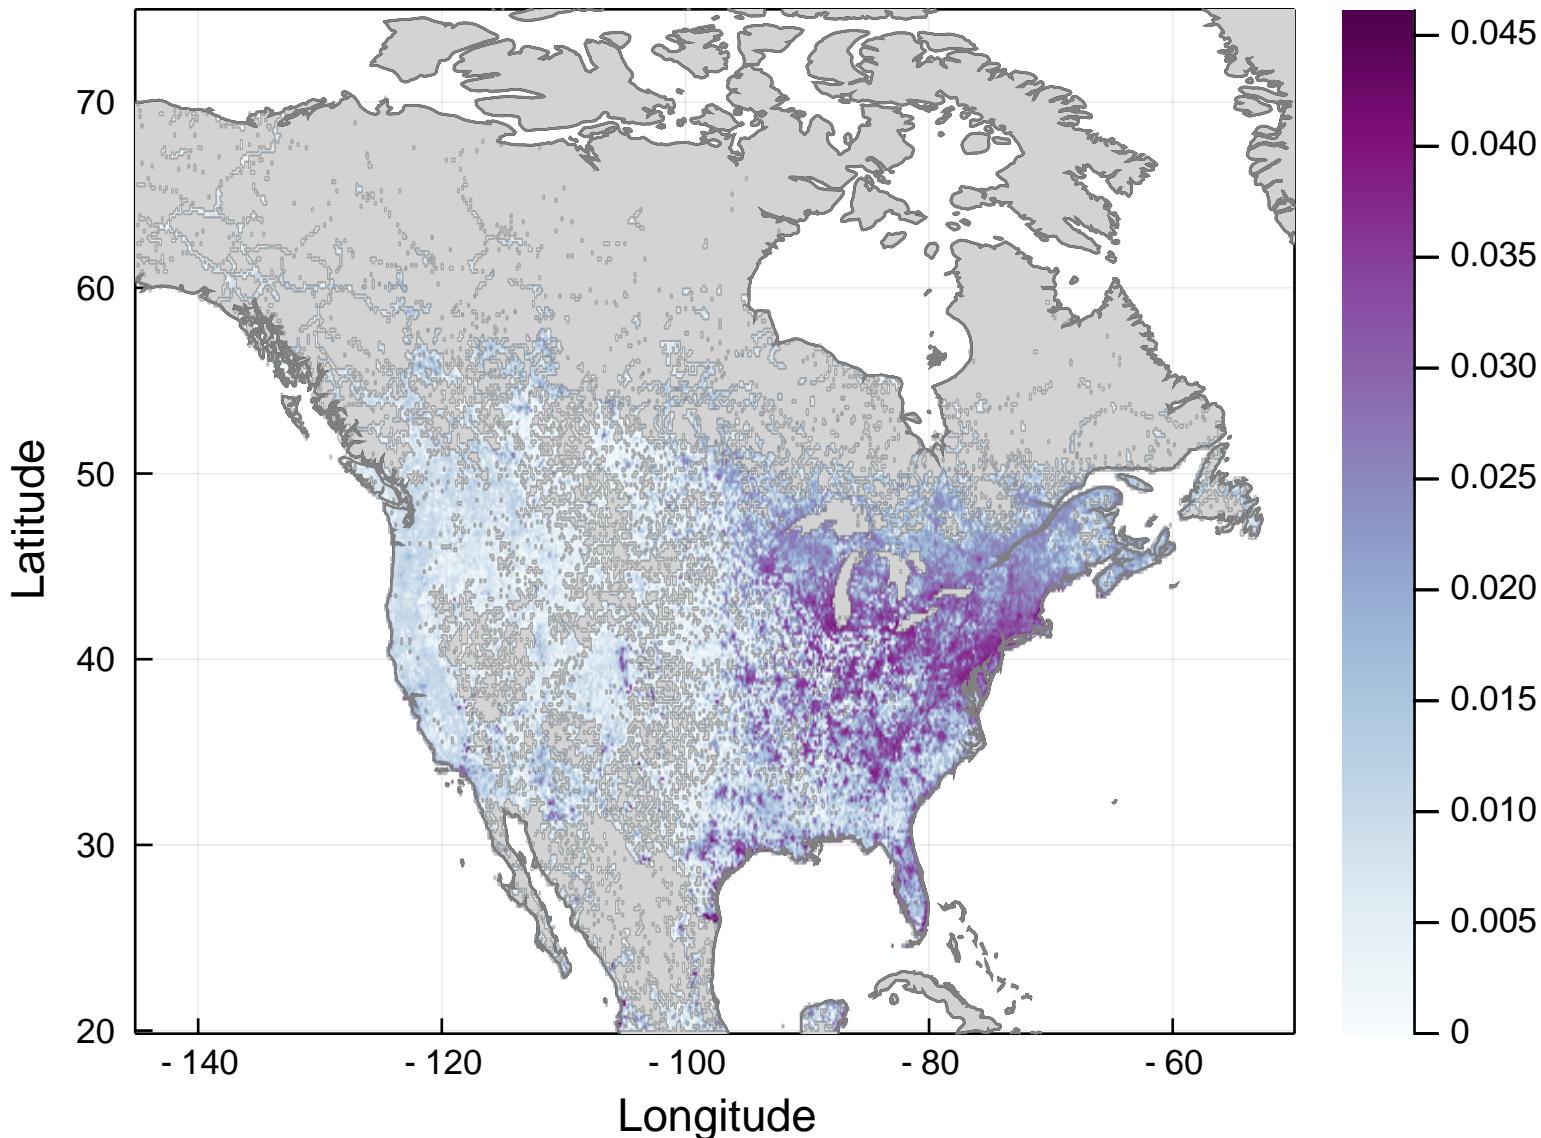

Number of species observed per site

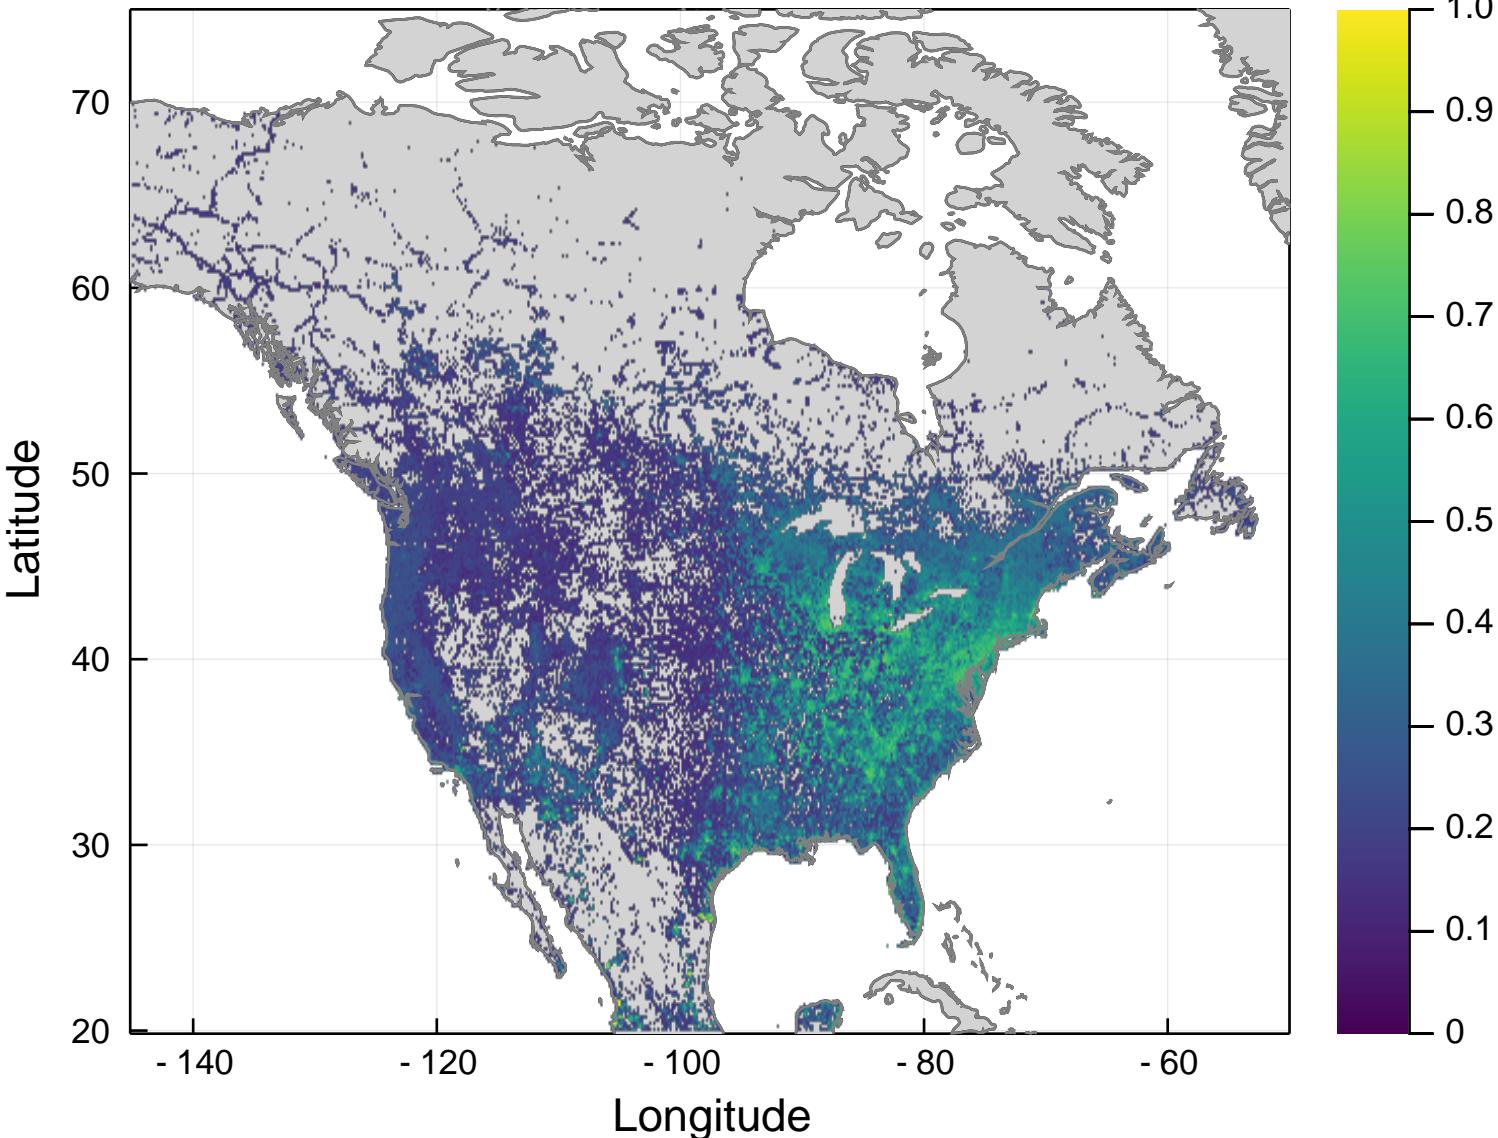

Species diversity (Pielou's evenness index - Site richness)

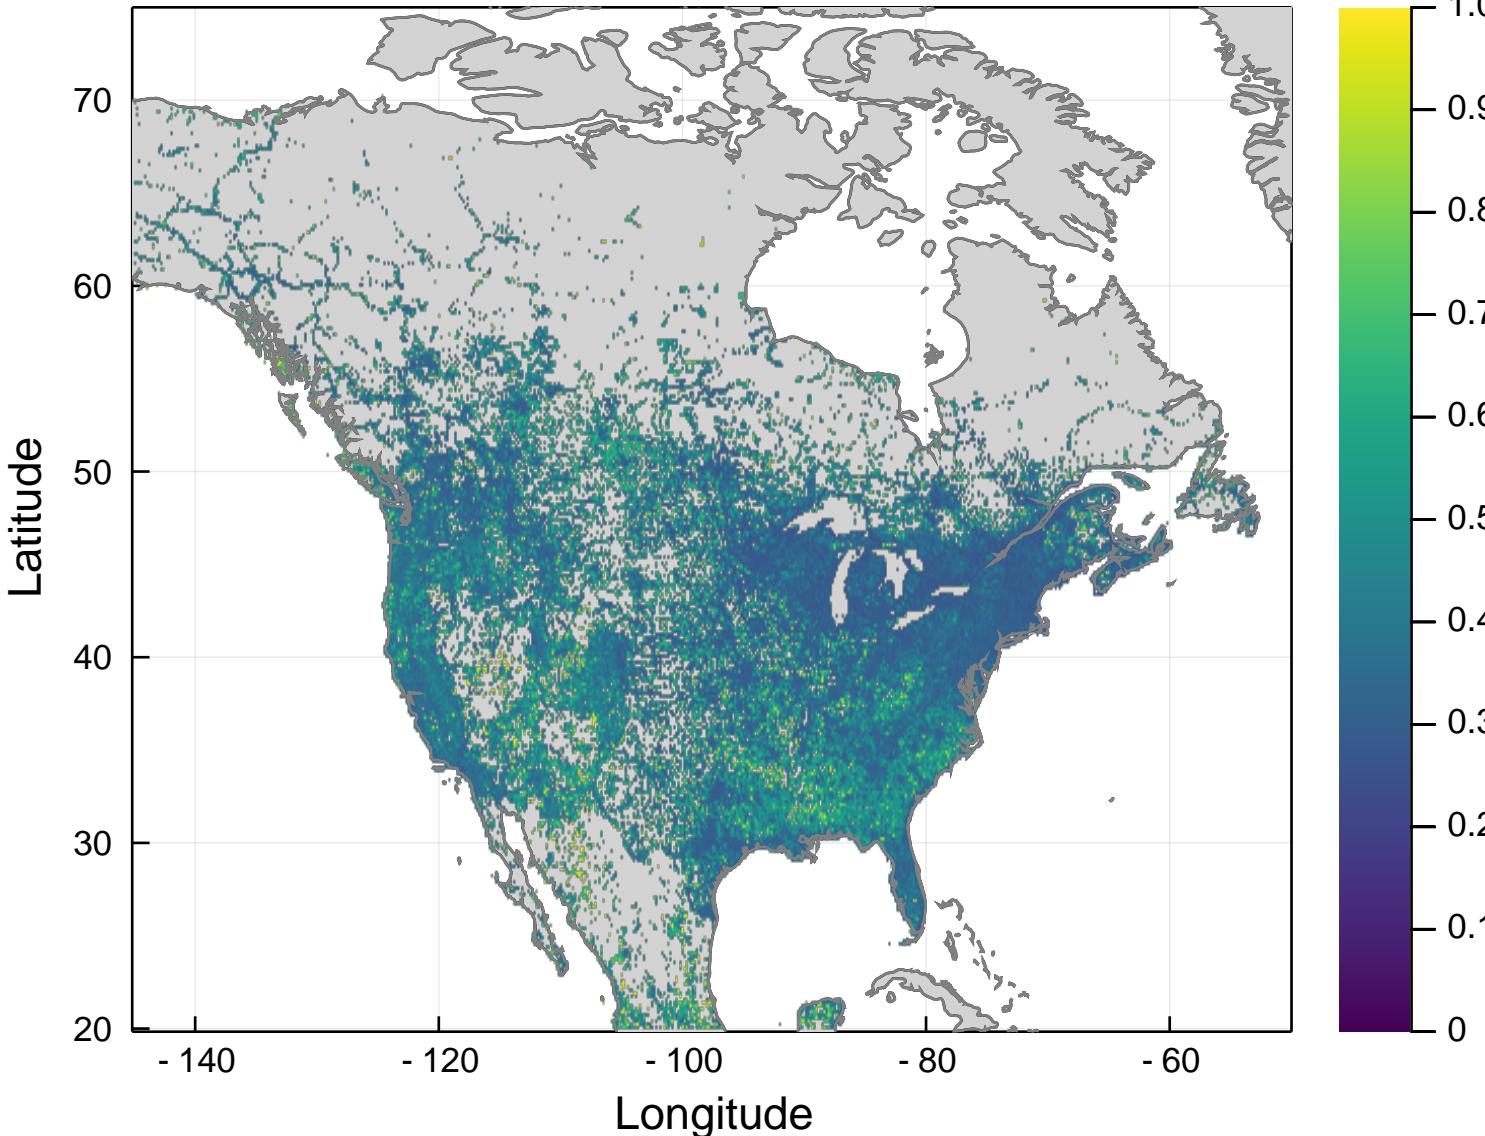

Species diversity (Pielou's evenness index - Total richness)

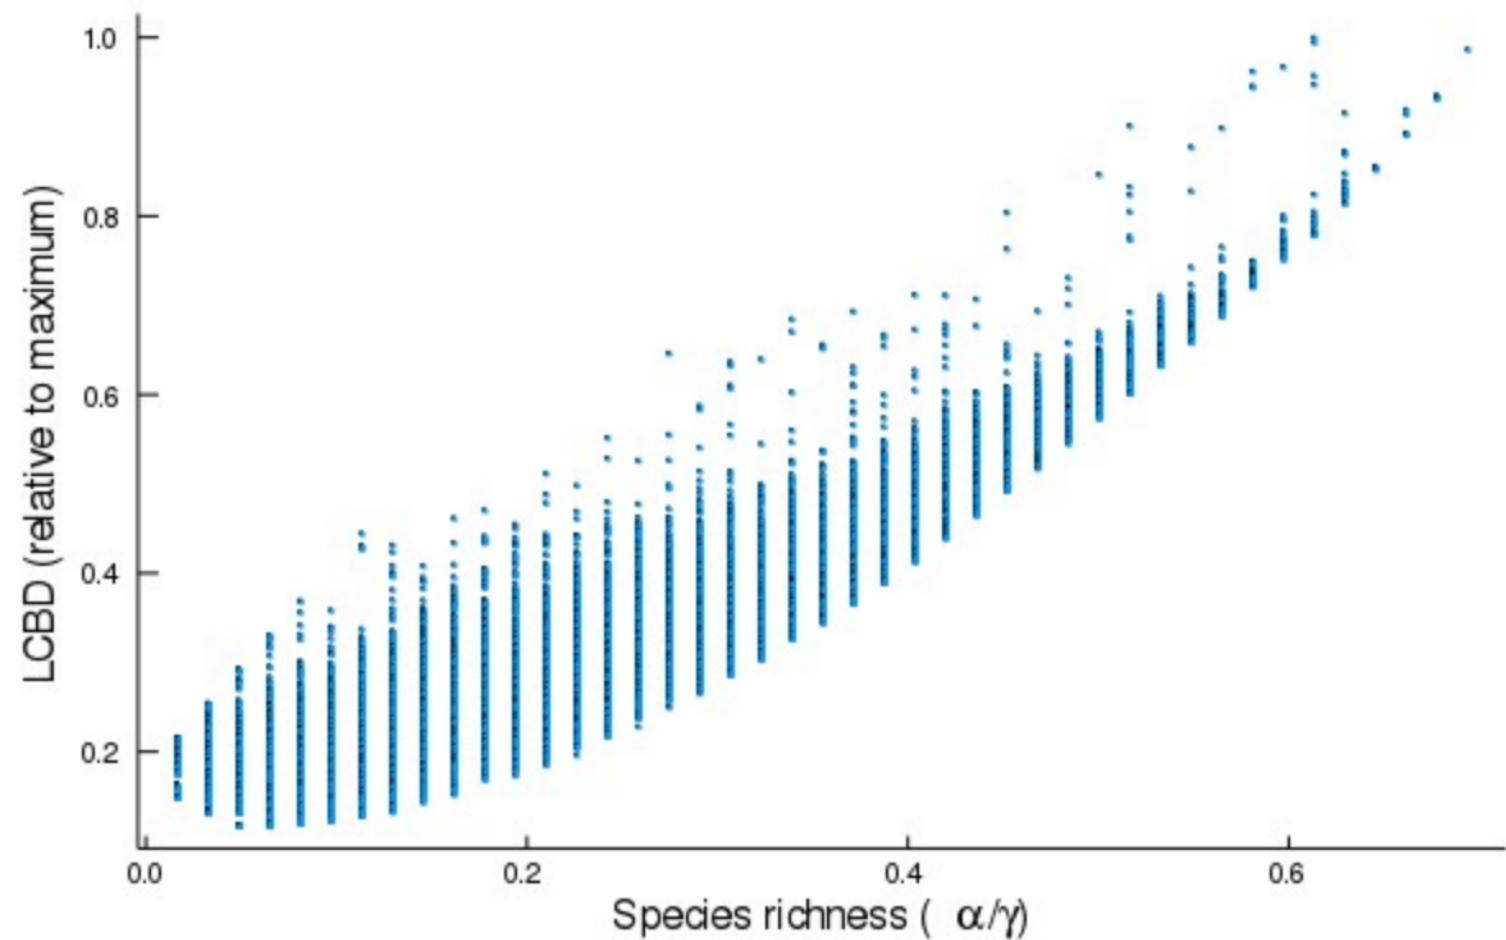

LCBD values per site (relative to maximum, raw data)

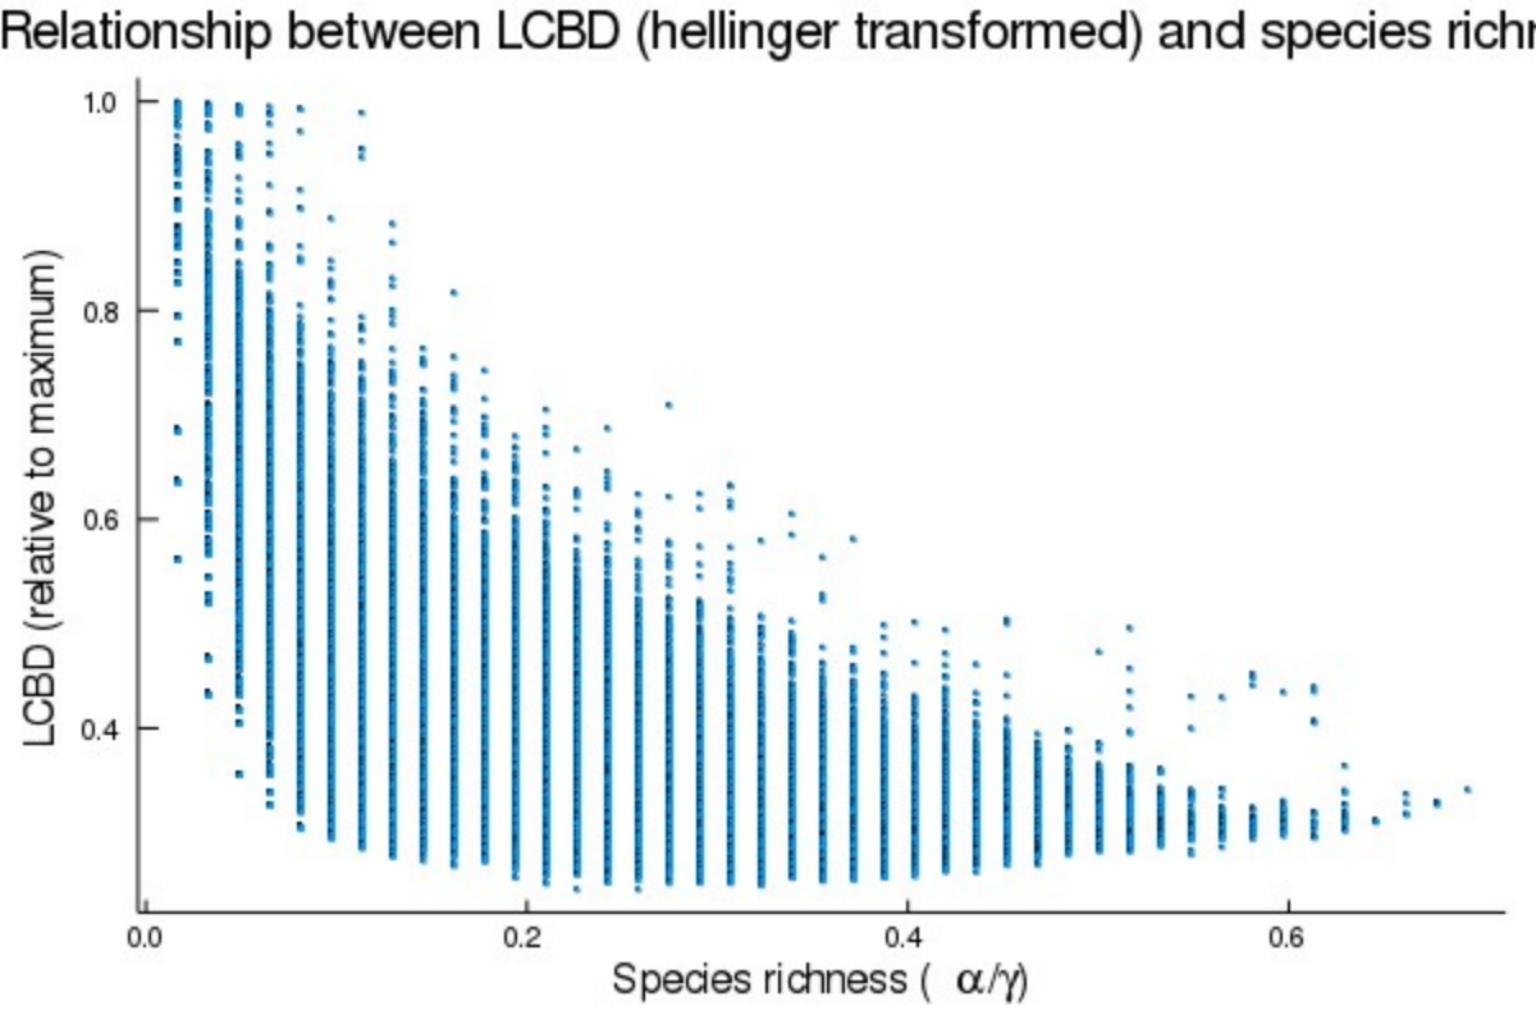

LCBD values per site (relative to maximum, hellinger transformed)

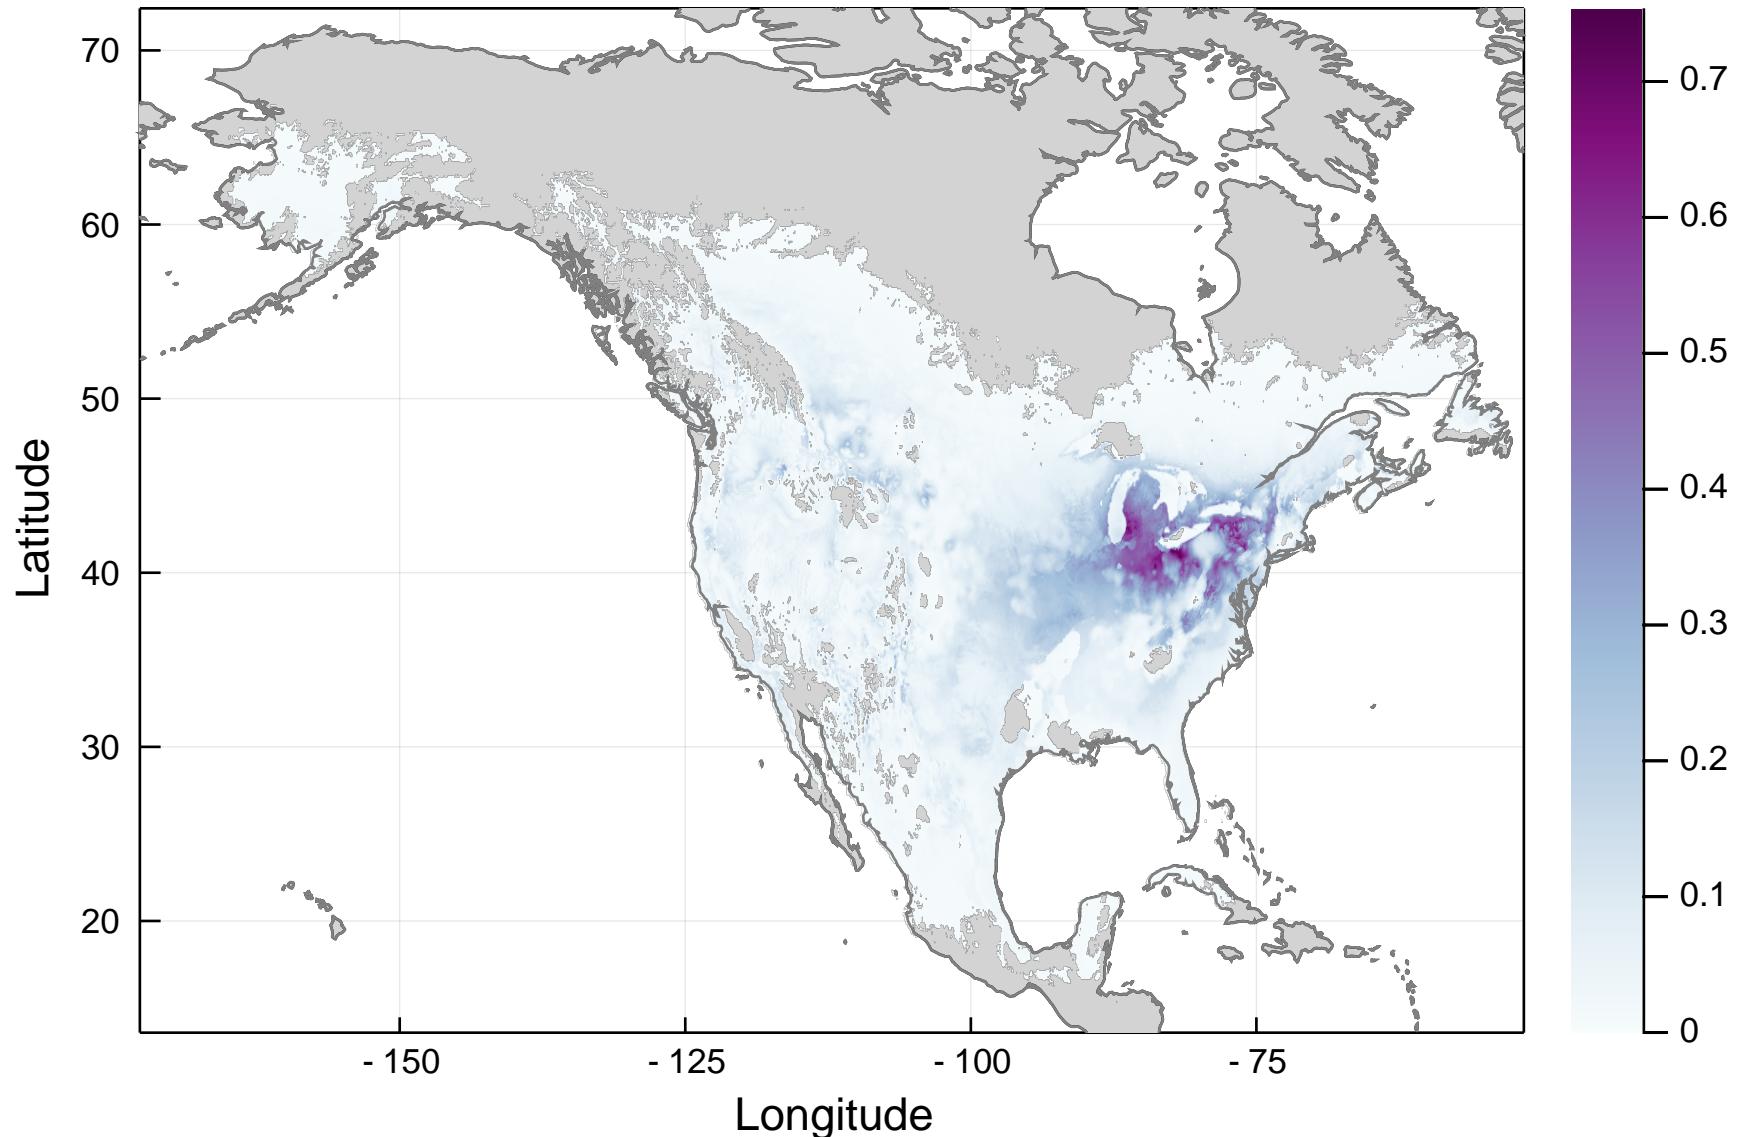

Relationship between LCBD and species richness

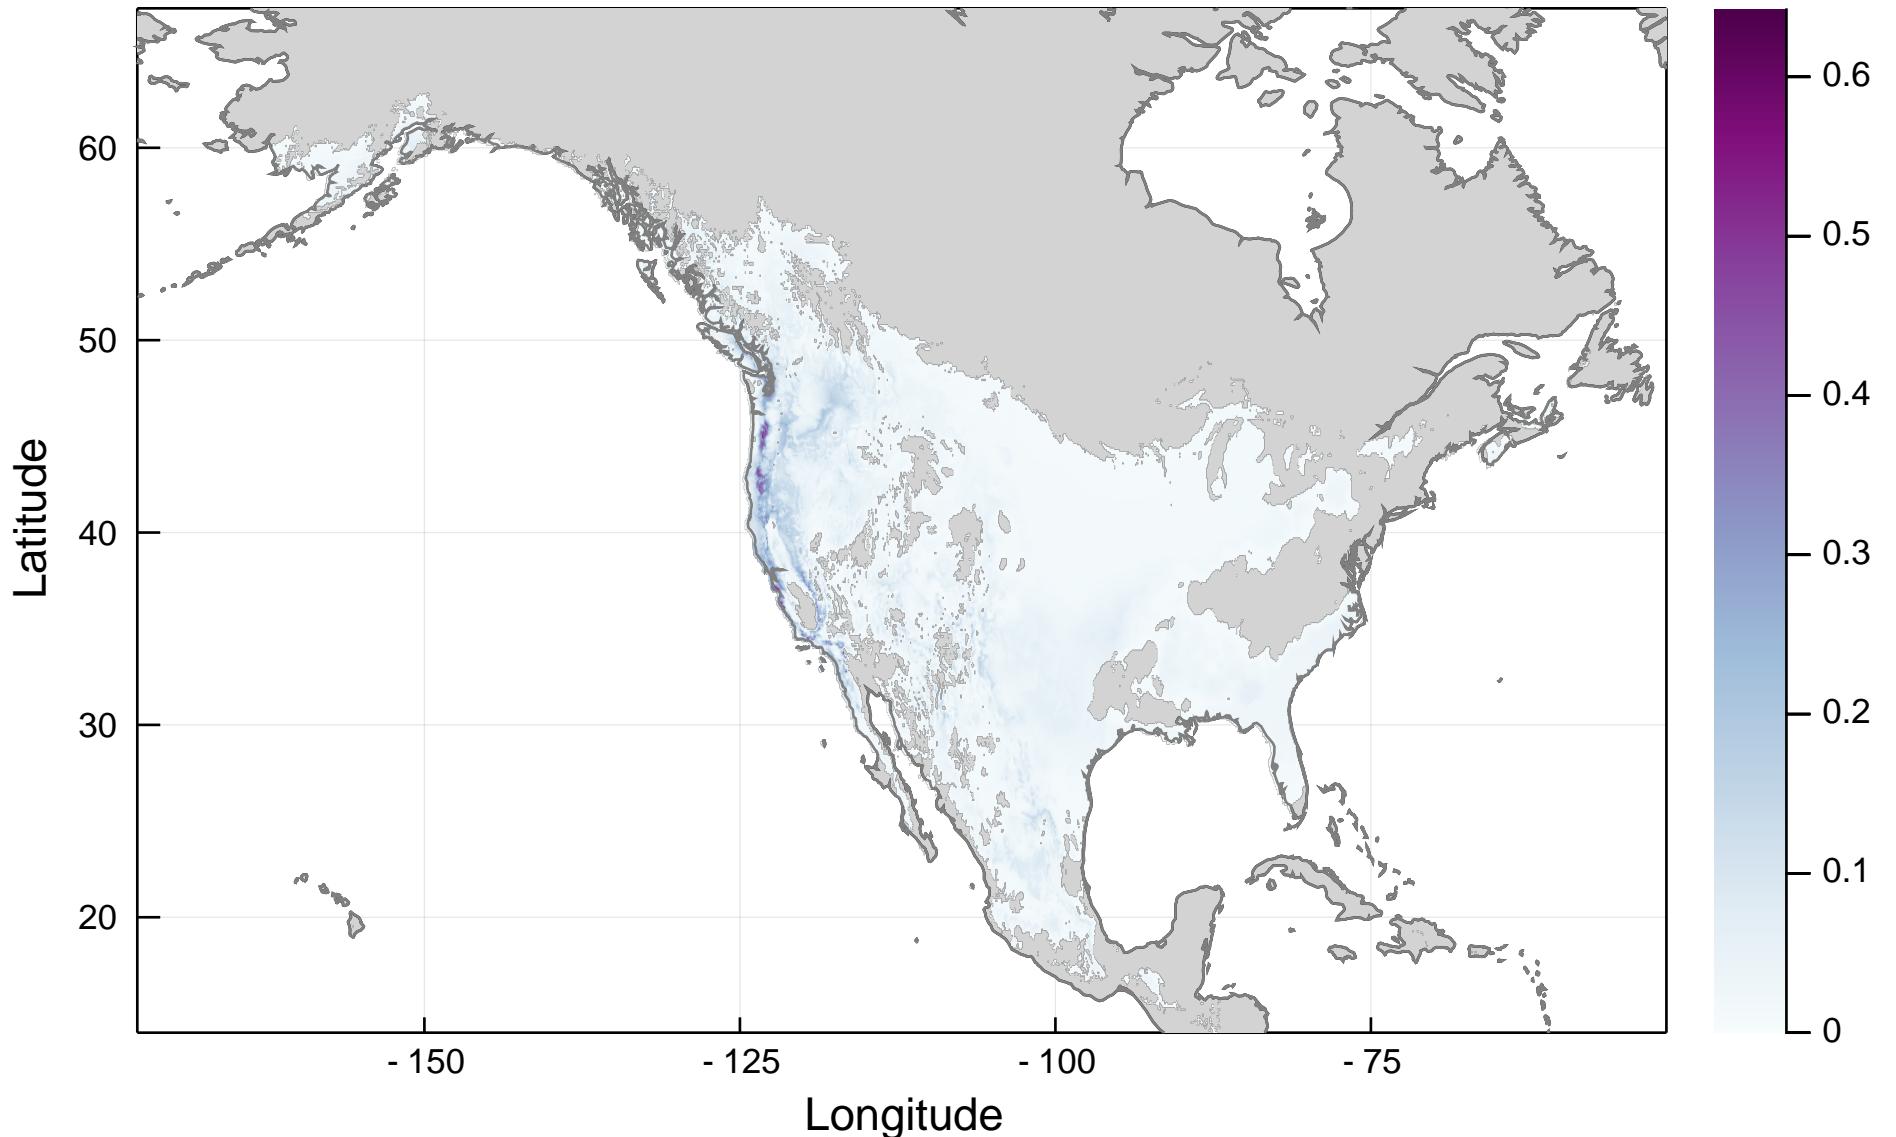

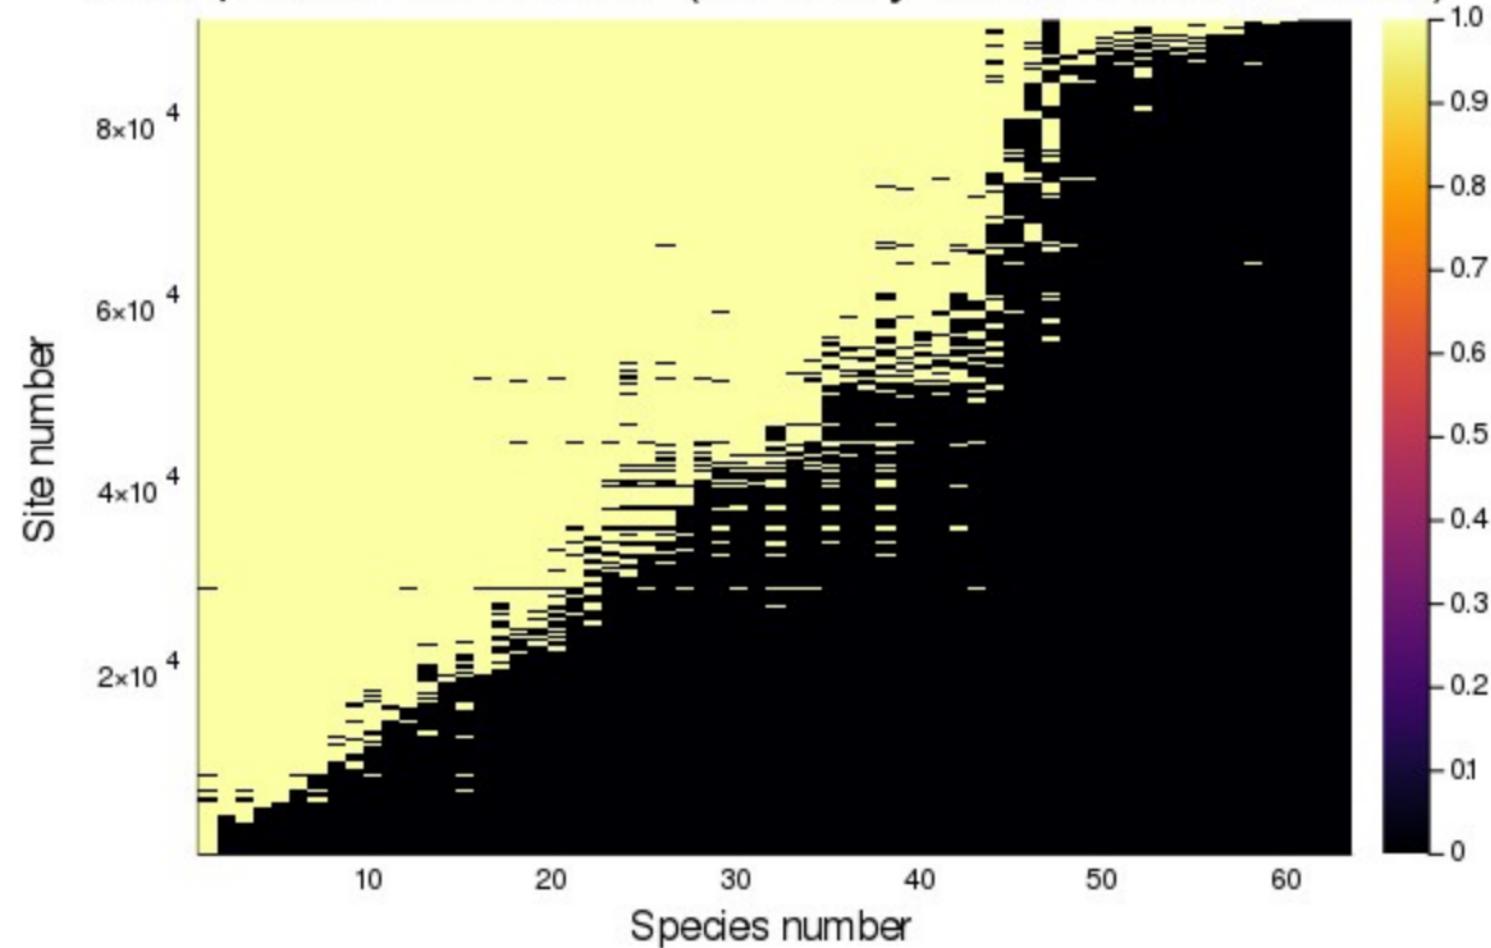

Setophaga petechia

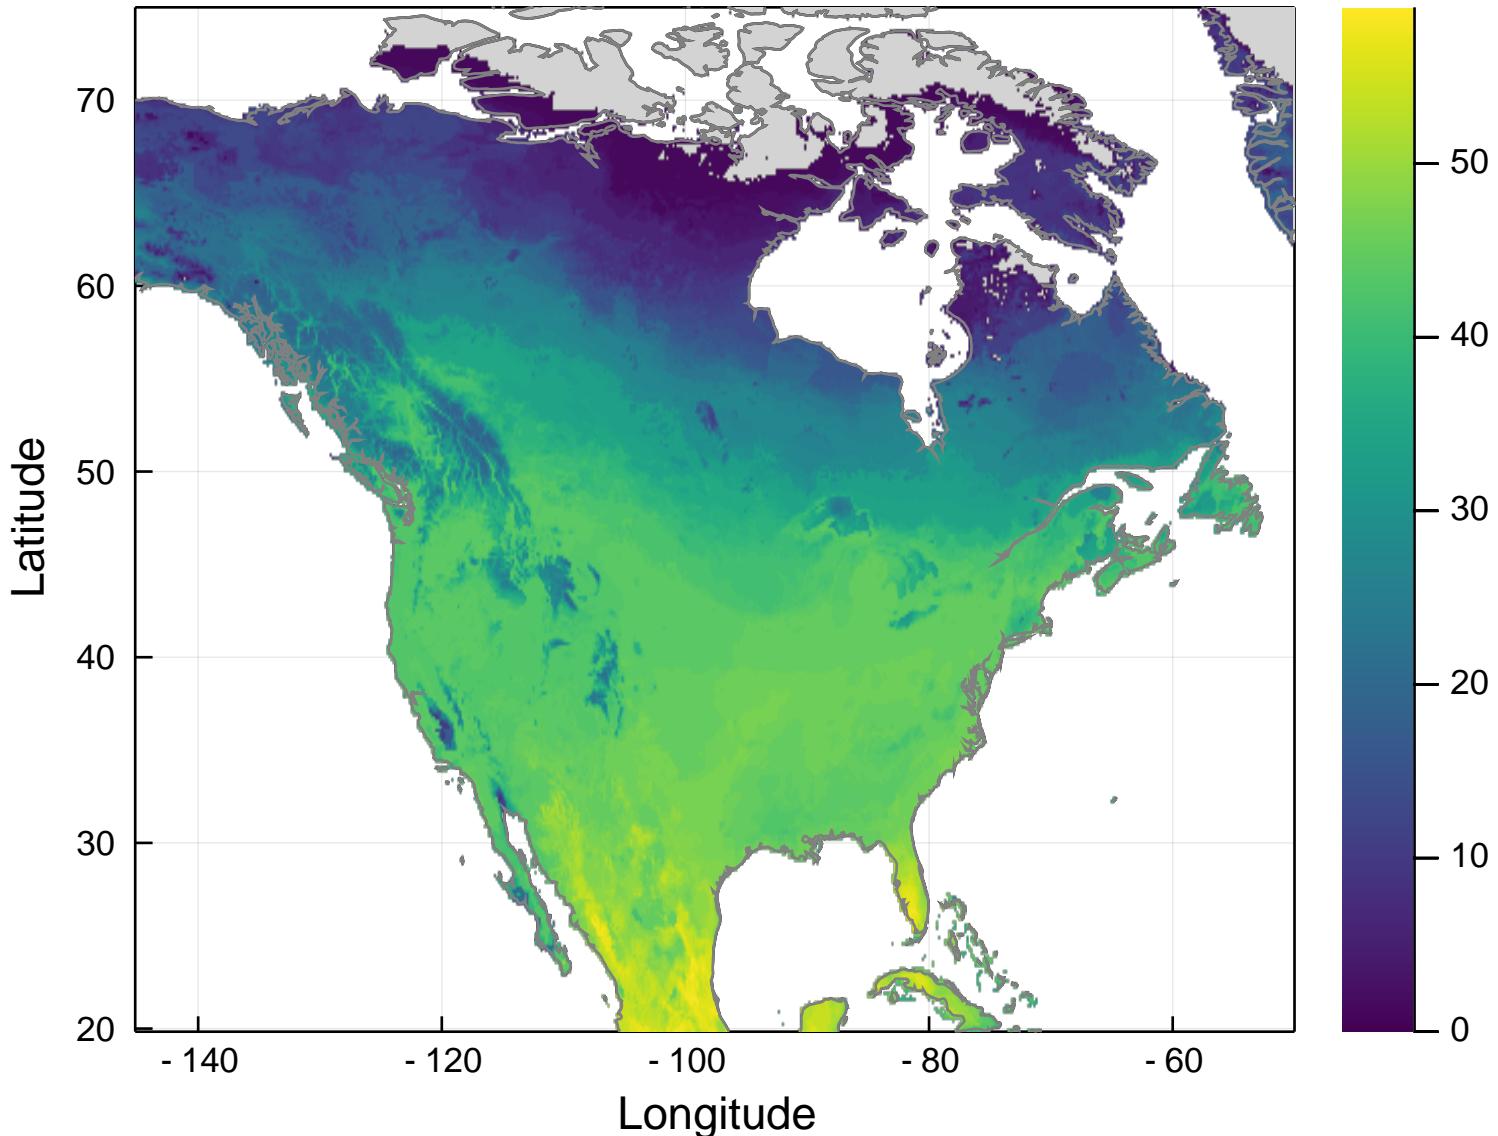

Setophaga_townsendi

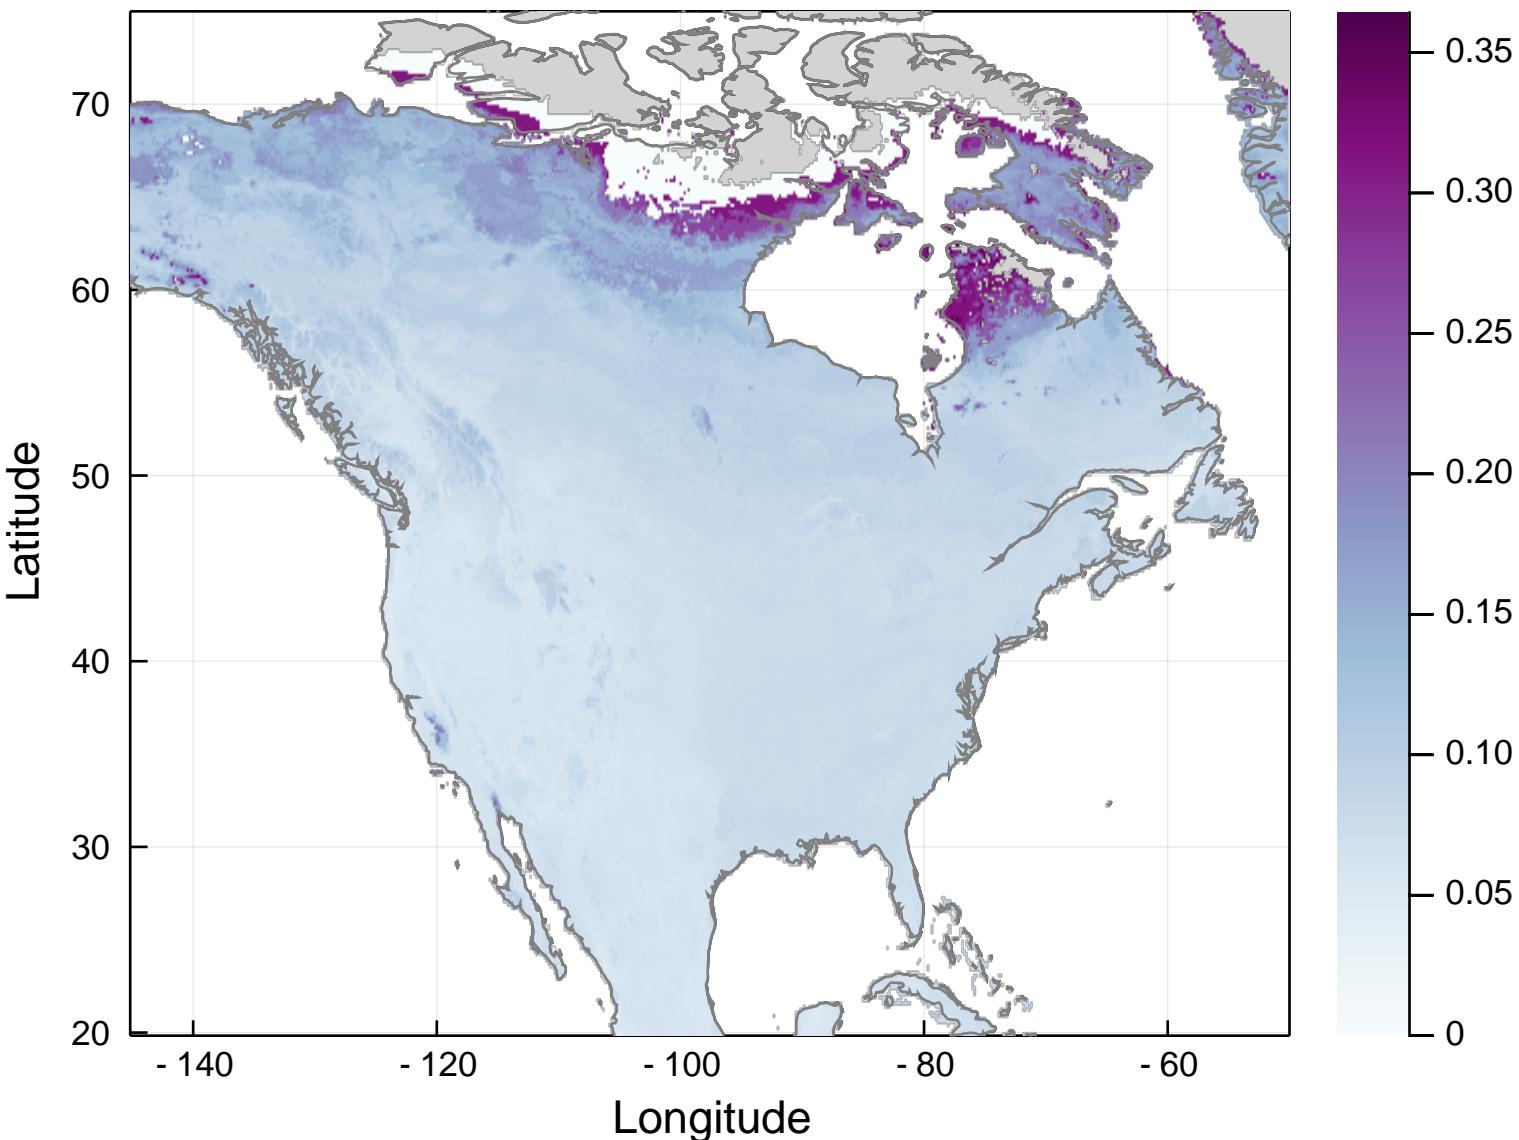

SDM predictions matrix Y (sorted by row and column sums)

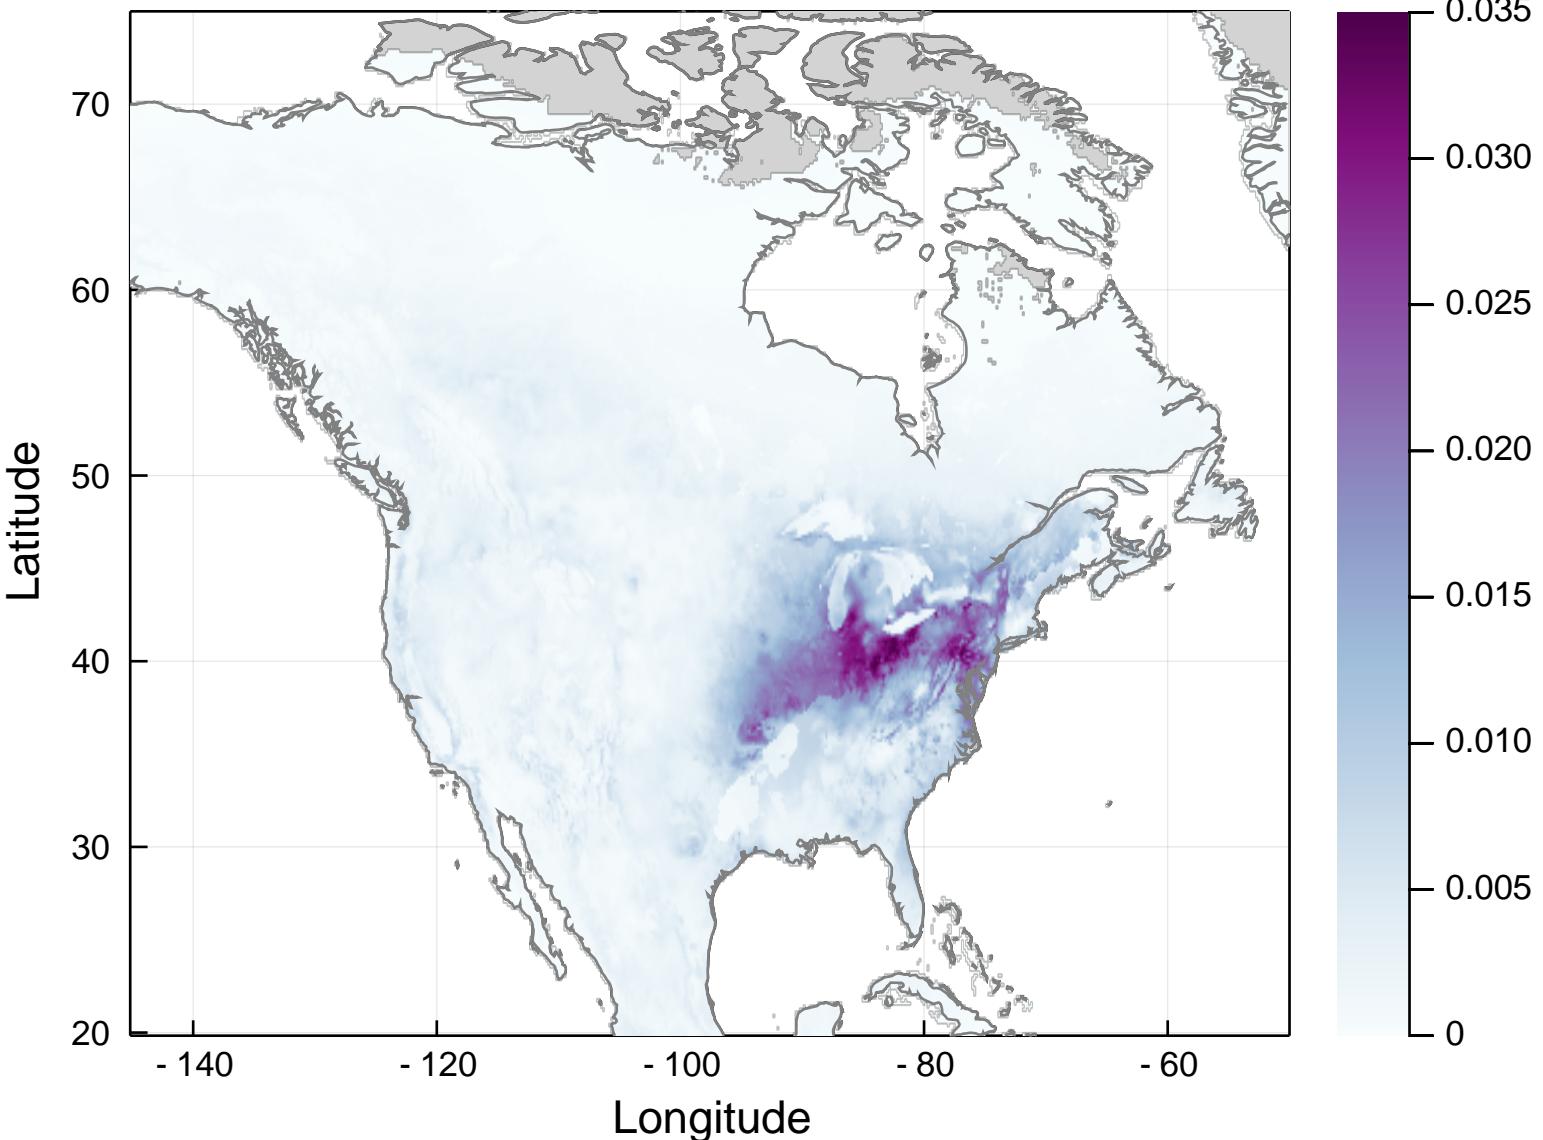

Number of species per site (SDM predictions)

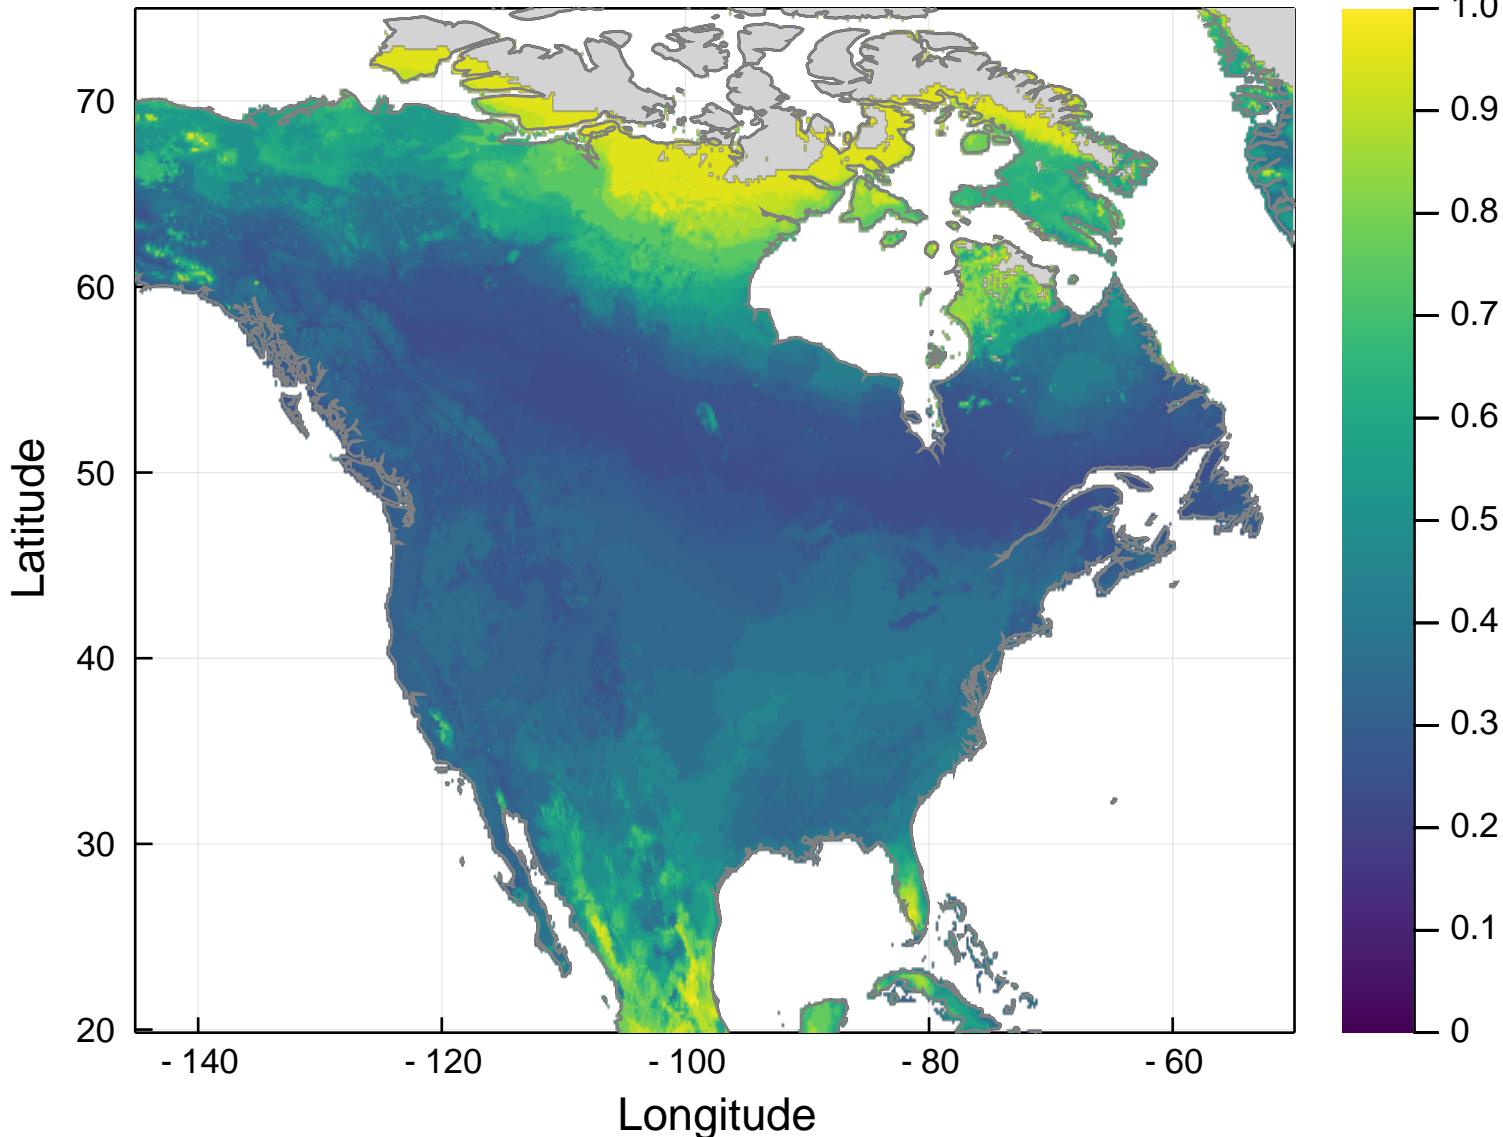

SDM species diversity (Pielou's evenness index - Site richness)

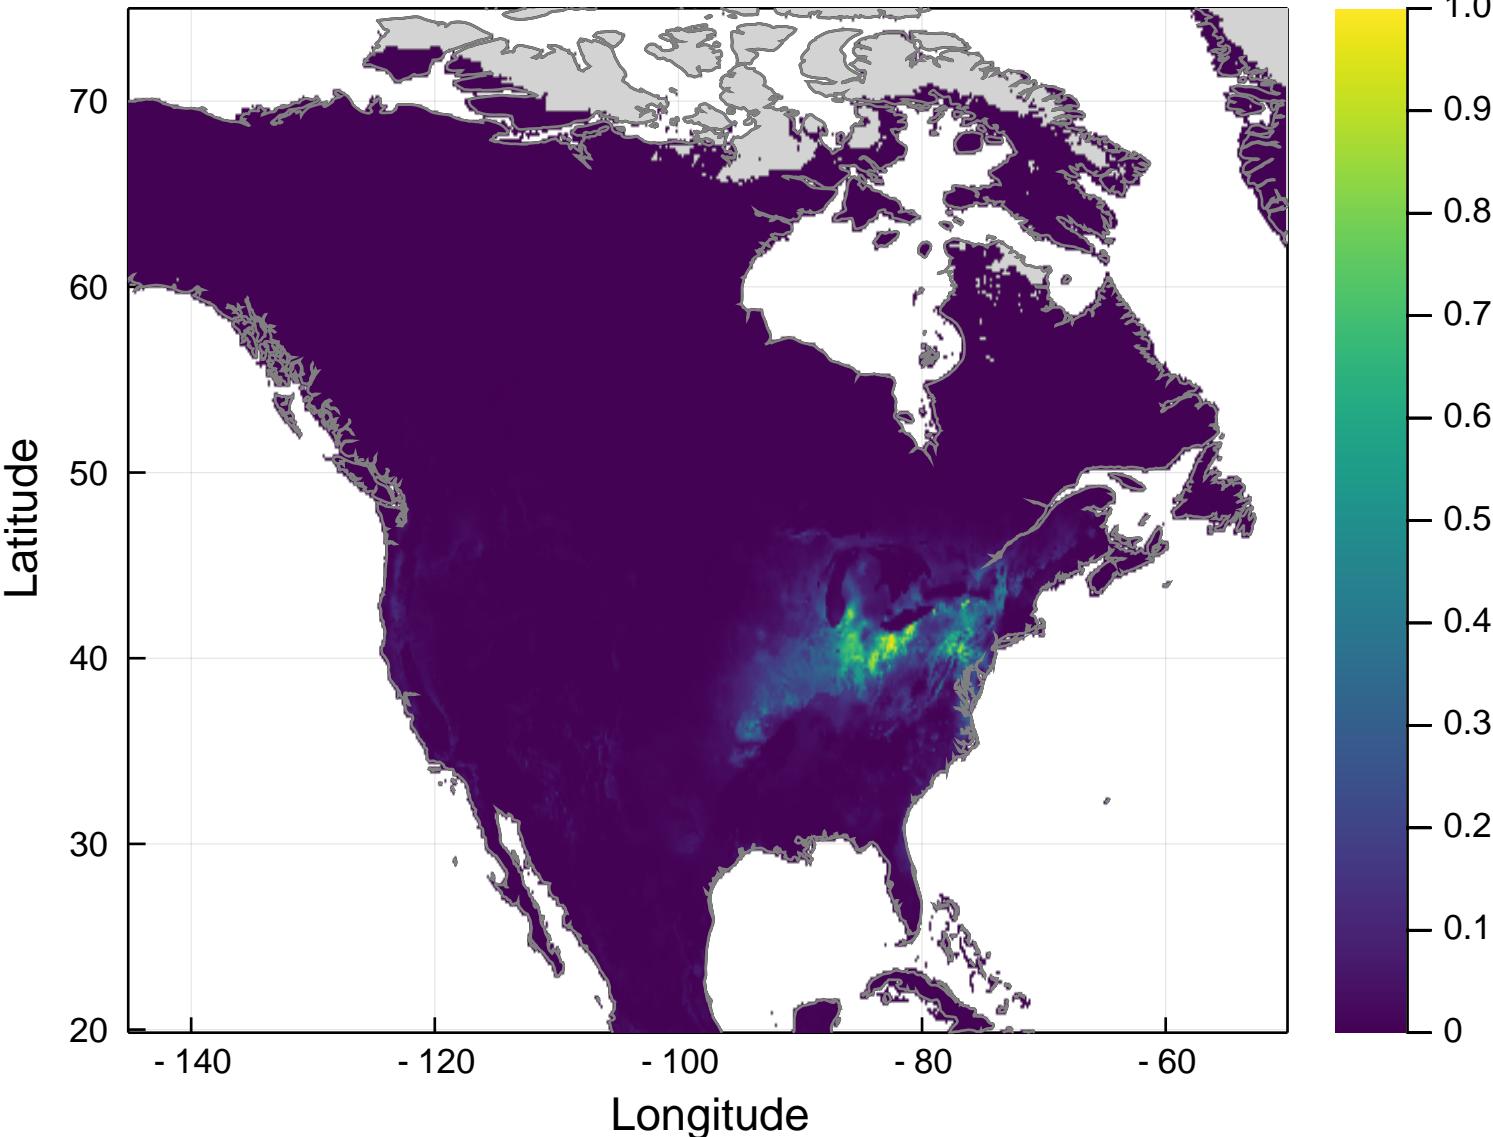

SDM species diversity (Pielou's evenness index - Total richness)

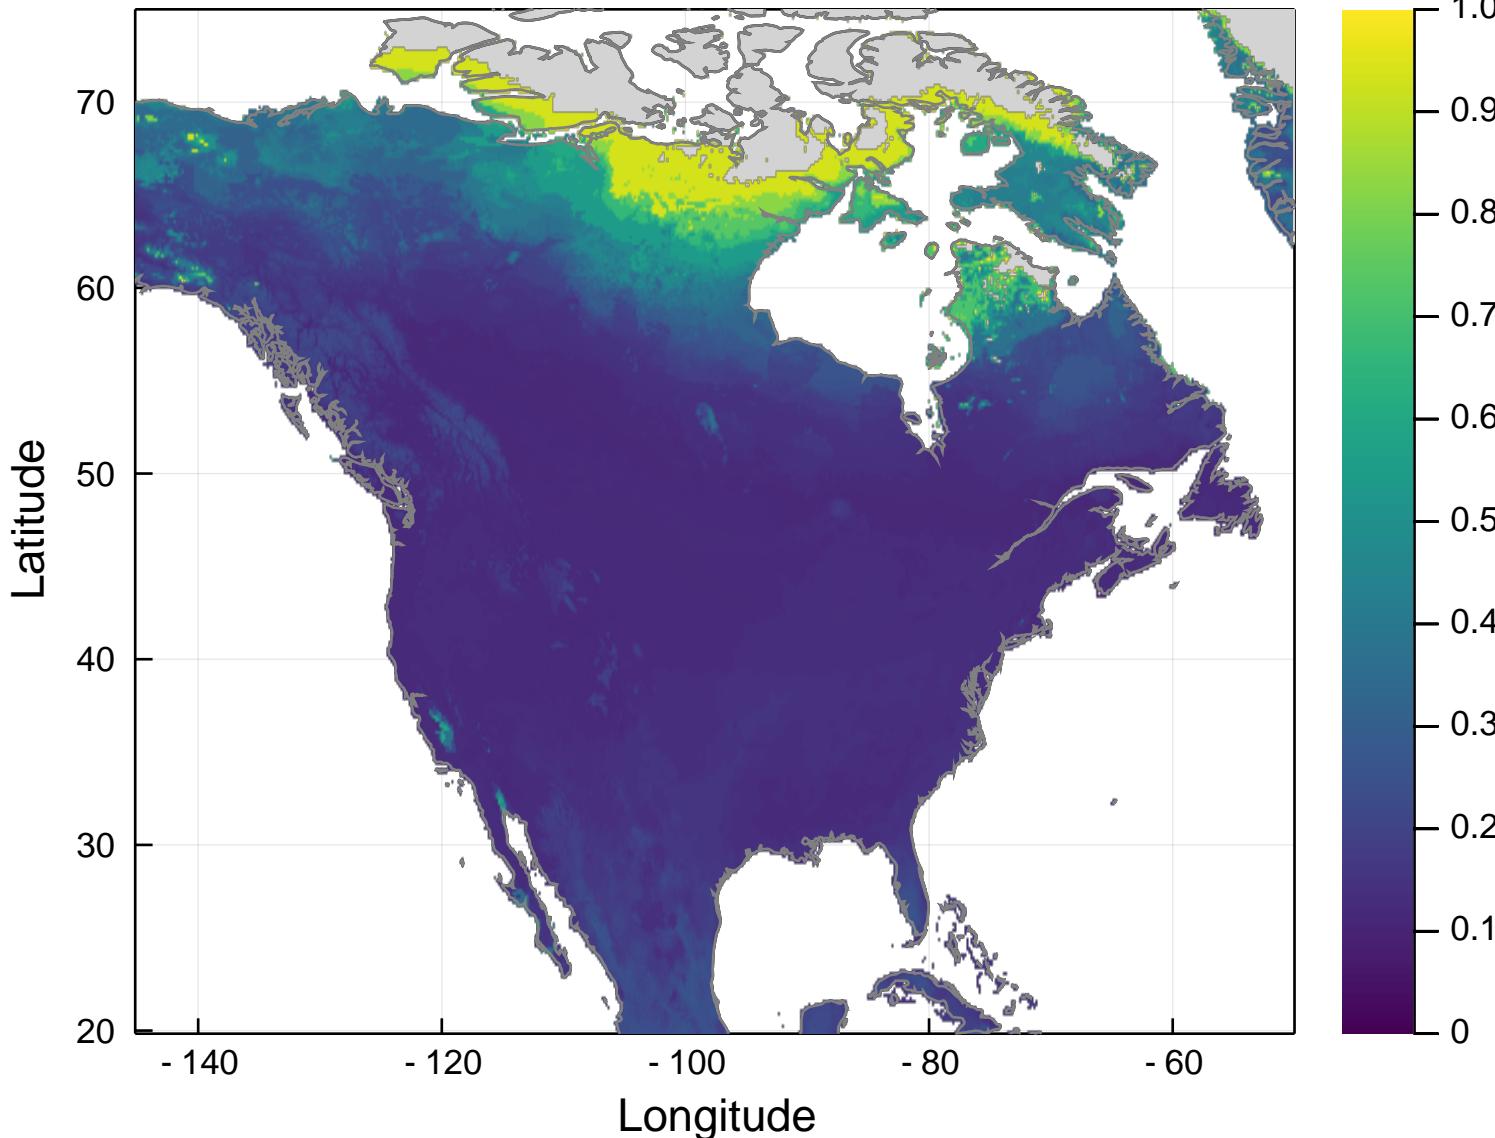

SDM LCBD values per site (relative to maximum)

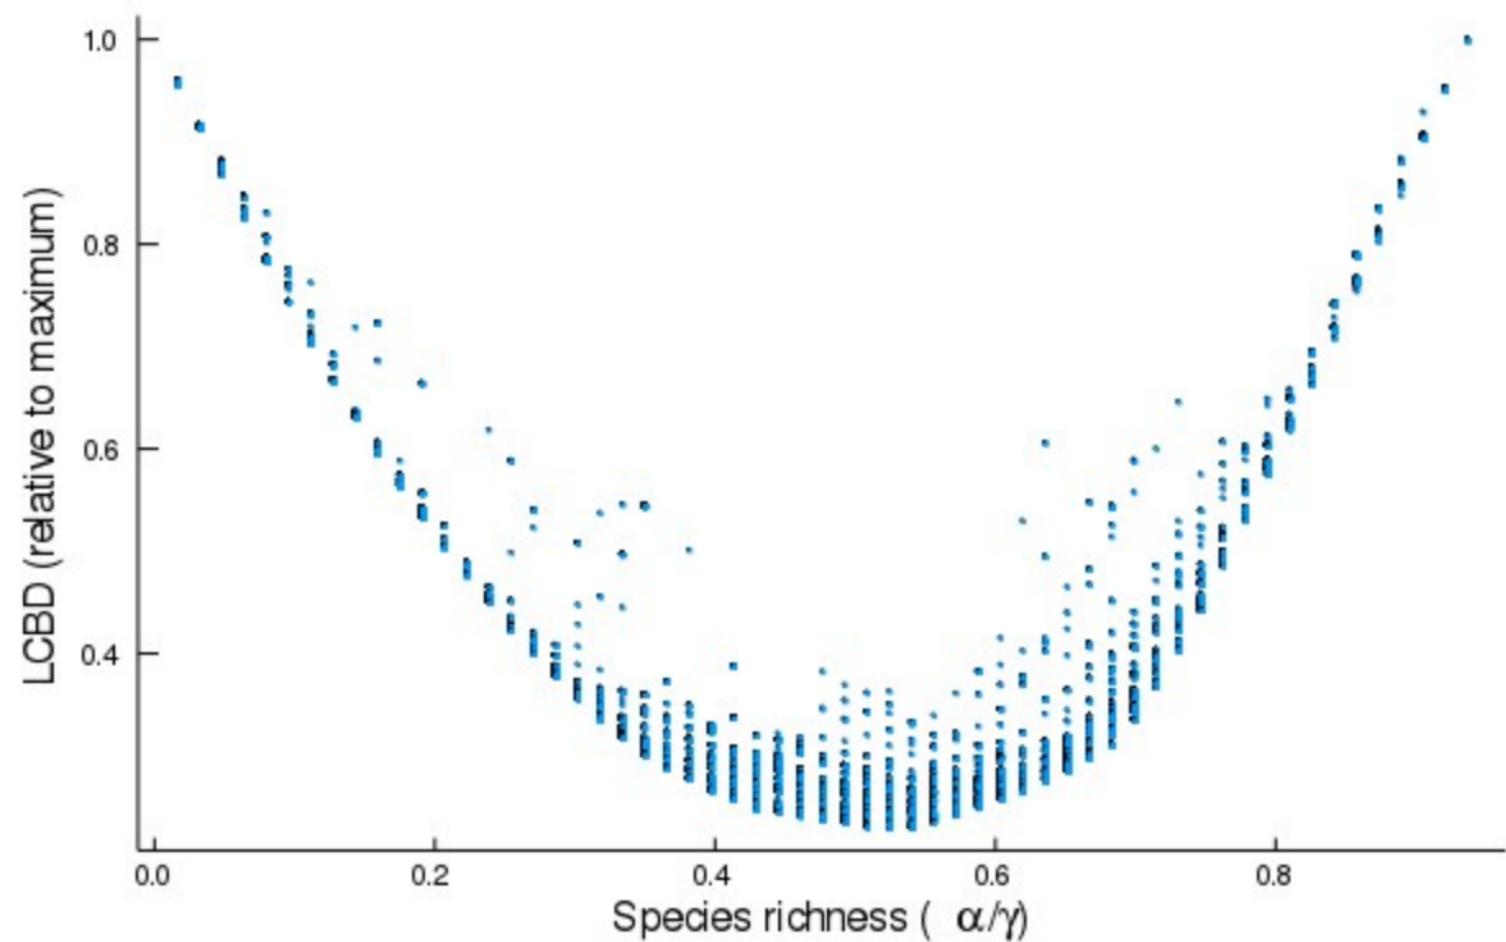

SDM LCBD values per site (relative to maximum, probability data)

SDM LCBD values per site (relative to maximum, hellinger transformed)

Relationship between LCBD and species richness

Relationship between LCBD (hellinger transformed) and species richness
